

COUNCIL DISTRICT 4 SAFETY IMPROVEMENTS

NEW SPEED TABLES!

NOTICE CALMER TRAFFIC IN THE NEIGHBORHOOD?

The Office of Councilmember Raman is thrilled to share that LADOT has completed the installation of 4 speed tables to mitigate speeding along Hyperion Avenue.

The new speed tables can be found on Hyperion Avenue near **Scotland St, Fernwood Ave, Udell Ct, and Entrance Drive.**

Pictured above is the new speed table just south of Tracy St on Hyperion Ave, helping make our streets safer for everyone!

COUNCIL DISTRICT 4 SAFETY IMPROVEMENTS

NEW SPEED TABLES!

BENEFITS OF SPEED TABLES:

1 REDUCED VEHICLE SPEEDS

Speed tables are similar to speed humps, but they are lower and flatter, allowing them to be used on arterial and higher-speed roadways to help reduce vehicle speeds.

2 IMPROVED SAFETY

Speed is the largest factor in both the number and severity of crashes, and slowing speeds therefore helps improve safety for drivers as well as people walking and biking.

3 IMPROVED LIVABILITY

Slower vehicles and safer streets don't just save lives – they also encourage more outdoor play, walking, and activity.

4 IMPROVED TRAFFIC FLOW

Unlike traditional speed humps, speed tables allow for a smoother, slower ride without abrupt stops, causing less braking and acceleration noise while reducing wear and tear on vehicles.
